

25th Street

Midway Road

25th Street Improvements currently under design

We will investigate the opportunity for joint-use ponds along the corridor to minimize right-of-way requirements.

Access management issues to be evaluated

Safety of horizontal alignment and superelevation to be examined

Roadway alignment may be affected by environmental constraints

Begin Study

Midway Road at 25th Street intersection is not included in 25th Street improvements. Intersection operations and potential improvements to be examined as part of PD&E

Undeveloped parcels have potential for future development

Potential 100-year floodplain impacts

Two-lane to one-lane merge operations and geometric design considerations to be examined

Midway Road PD&E Study
